Hive Active Heating

The UK's favourite wireless thermostat.

Come back to a nice warm house, without ever heating an empty one. Hive Active Heating lets you control your heating from your smartphone with our beautifully designed thermostat. And if you've got a hot water tank, you can control that too. A great way to save money and energy.

The Hive App

The Hive experience comes alive through the Hive app that lets you control your home at the tap of a button.

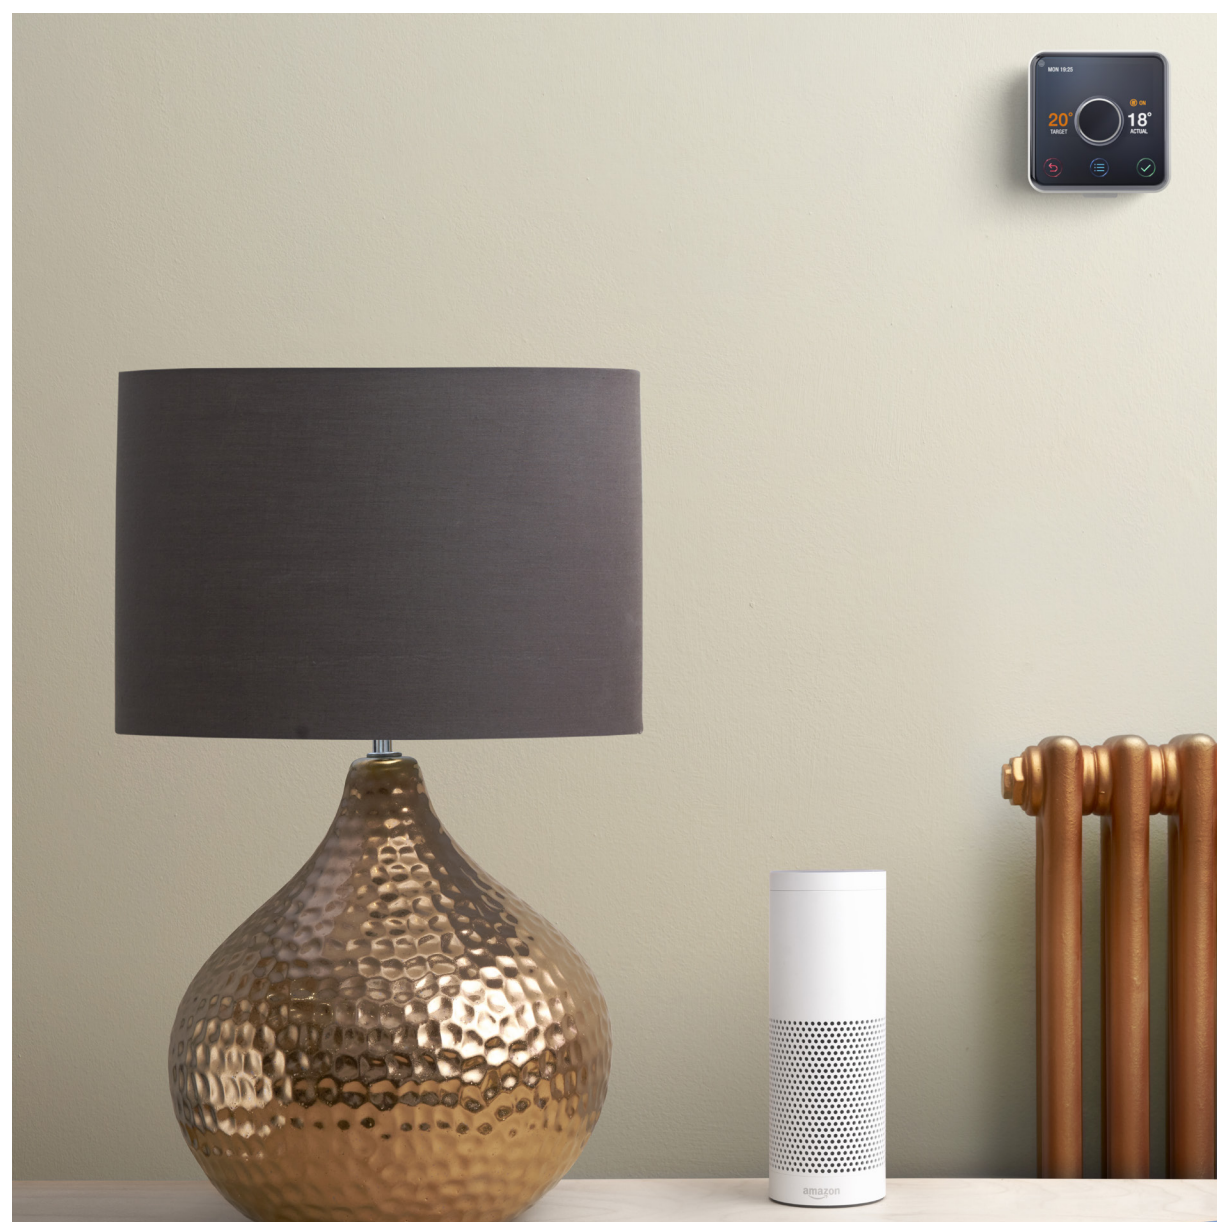

Our award-winning app puts your home in your hand. It makes looking after your home incredibly easy, so you can spend more time doing the things you love.

Hive Actions

With Hive Actions, your Hive products come to life, working together magically without you having to do a thing.

For example, by linking your Hive Active Plug to your motion sensor the kettle can start to boil the minute you arrive home from work.

Connects with Amazon Echo

Hive devices are compatible with other products and services like Amazon Echo, making your home even smarter.

With our Hive Hub you can connect Amazon Echo to all your Hive services. That way if you want to turn on your lights, all you need to do is ask. Alexa, lights on!
